

Daily Article (Bharath's Reading list) - Answers and Explanations 22.09.2023

Article link : <https://bit.ly/3ZqvtyA> (What OpenAI Really Wants)

1. According to the article, the "quasi-messianic mission" of OpenAI is:

- A. To build artificial general intelligence that can match whatever peak biology can attain
- B. To build a revolutionary neural net to understand and generate coherent text to respond to prompts
- C. To build artificial general intelligence and to make it safe for humanity
- D. To work on and release cutting-edge AI products to address societal risks

Explanation : C

Note the lines, 'For Altman and his company, ChatGPT and GPT-4 are merely stepping stones along the way to achieving a simple and seismic mission, one these technologists may as well have branded on their flesh. That mission is to build artificial general intelligence—a concept that's so far been grounded more in science fiction than science—and to make it safe for humanity.'

2. Which of the following is not a reason why Altman wanted to make OpenAI a nonprofit entity?

- A. He felt AGI was within reach and it could address humanity's problems better than humanity could
- B. He thought big corporations would be too fixated on their products to seize the opportunity to develop AGI as soon as possible
- C. He felt that if an organization did create AGI but with a commercial motive, it might recklessly unleash AGI upon the world without the necessary precautions
- D. He wanted to bring in talented people working on cutting-edge research to create patentable AGI that can transform humanity

Explanation: D

OpenAI, when it was established, was determined not to apply for patents, according to the article.

3. According to the article, Open AI warned potential investors that:

- A. They are unsure of the role money will play in a post-AGI world and so investors may not make a return on their money and may even lose all it
- B. If the company does manage to create AGI, all financial arrangements will be reconsidered
- C. They do not know what AGI really is, only that it is the final purpose of the field of AI
- D. All the above

Explanation: D

All given points are mentioned in the article.
