

Daily Article (Bharath's Reading list) - Answers and Explanations 28.06.2023

Article link : <https://bit.ly/46knaaR> (The constant pain that dominated my pre-menopause life)

1. Based on the article, which of the following is true?

- A. Not having children may be a factor in having adenomyosis
- B. Chronic anaemia may lead to adenomyosis
- C. Untreated adenomyosis may be a factor in not being able to have children
- D. None of the above

Explanation : C

Note the line, 'It is certainly not, as I've heard someone say, because you haven't had children. (I haven't, it is not a factor in having adenomyosis, although untreated adenomyosis may well be a factor in not being able to have them.)'

2. The author believes adenomyosis is rarely discussed because:

- A. Though a debilitating gynaecological problem, adenomyosis is uncommon
- B. Women's pain is endlessly sidelined and dismissed by society
- C. The condition has not been medically well researched or understood
- D. All the above

Explanation: B

Option B is the main idea in the article. Option A is incorrect, based on the given information and option C is not mentioned in the article.

3. According to the author, broadcaster Naga Munchetty speaking out about her experience matters because:

- A.It can help other silent, sidelined sufferers identify the condition and seek medical help
- B.Too many adenomyosis sufferers believe it is normal to be in chronic pain every month
- C.High profile sufferers speaking out about a medical condition can help draw attention to it
- D.All the above

Explanation: D

All given points are discussed in the article.
